

## Memorandum

Date: April 3, 2015

From: Compliance Officer  
Labeling and Dietary Supplement Compliance Branch, HFS-608  
Division of Enforcement  
Office of Compliance, CFSAN

Subject: Import Alert Recommendation

To: Samuel Chan, Consumer Safety Officer  
Division of Import Operations, HFC-170

---

CFSAN **does not concur** with the addition of the firm to Import Alert #66-41

**Case Information:**

MARCS-CMS: 451549  
Entry No.: XXX-0301847-1 (20140349103)

Firm: Wendi Rizaldi  
Melati Blk Jln Umut Talib 1 Gg  
Pontianak, Kalimantan Barat  
Indonesia

FEI: 3011112682

Product: Kratom Leaf Powder (Mitragyna Speciosa Powder Leaf)  
Product Code: 54 Y Y Y 99

CFSAN has reviewed the evidence provided for the above Import Alert recommendation. Based on this review, CFSAN does not concur with the addition of the above referenced firm to Import Alert #66-41, "Detention Without Physical Examination of Unapproved New Drugs Promoted In The U.S."

This CMS case stems from the Center review of detained shipment for Refusal, CMS #446541. In that case, CFSAN recommended the addition of the above referenced product and the firms Paul Sturgis and Mood & Mind be added to Import Alert #66-41. The basis of this recommendation was the discovery of information attributable to the principle of Mood & Mind, Paul Sturgis, which demonstrated his knowledge of the product's use as a drug sufficient to classify the product as a drug within meaning of section 201(g)(1)(B) and/or 201(g)(1)(c) of the Act and furthermore as a new drug within the meaning of section 201(p) without an effective new drug application (NDA) [Unapproved New Drug, section 505(a)].

None of the information obtained by CFSAN is demonstrated to be attributable to the manufacturer/grower of the product, Wendi Rizaldi. Because the evidence does not support

the fact that the manufacture/grower knows of the product's use as a drug, CFSAN cannot determine if the product would be properly classified as a drug subject to Import Alert #66-41 if offered for entry by the manufacturer/grower through another importer.

Based on the foregoing, CFSAN continues to support the addition to Import Alert #66-41 of the firms Paul Sturgis and Mood & Mind and their product. However, CFSAN does not support the addition to the Import Alert of the manufacturer/grower, Wendi Rizaldi.

If you have any questions or need to discuss this case you may contact me at (240) 402-2062 or by e-mail at [Shawn.Goldman@fda.hhs.gov](mailto:Shawn.Goldman@fda.hhs.gov).

## Memorandum

Date: September 25, 2015

From: Compliance Officer  
Labeling and Dietary Supplement Compliance Branch, HFS-608  
Division of Enforcement  
Office of Compliance, CFSAN

Subject: Center Decision regarding detention recommendation for Mitragyna Speciosa

To: Allison McGloin, Compliance Officer  
Cincinnati Compliance Branch, HFR-CE440  
Cincinnati District

---

CFSAN **concurs** with the detention recommendation and **supports** the addition of the product and firms to Import Alert #54-15, "Detention without physical examination of dietary supplements and bulk ingredients that are or contain Mitragyna Speciosa or kratom" and **supports** the addition of Kratom Crazy to Import Alert #66-41, "Detention Without Physical Examination of Unapproved New Drugs Promoted In The U.S."

### Case Information:

MARCS-CMS: 476741  
Entry Nos.: AEK-1110634-8 (20146883373)

Firm: Cv Fabulift Borneo Mitra  
FEI: 3011590229

Firm: Teodorus Simbang  
FEI: 3011490283

Firm: Holly Chavez  
FEI: 3011656064

Product: Mitragyna Speciosa (in CMS as Raw Soap Material)  
Product Code: 53 P Y 99

CFSAN has reviewed the evidence provided for the above referenced detention recommendation. Based on this review, CFSAN concurs with the detention recommendation and supports the addition of the product and firms to Import Alert #54-15 "Detention without physical examination of dietary supplements and bulk ingredients that are or contain Mitragyna Speciosa or kratom."

On the entry documents for this entry, the Mitragyna Speciosa is identified as, "raw soap material." Also included with the entry is a sample product flyer which states, "[t]his product

is not intended for human consumption.”

These statements of intended use are contravened by other statements attributable to the parties of the entry, as further outlined below.

### **Cv Fabulift Borneo Mitra**

On the Facebook page titled Fabulif Borneomitra, CV there is a link from September 25, 2013, which states, “Finally! Thailand Legalizes Kratom – You’ll Never Guess Who Uses It.” On the YouTube page for this video the following statement is found in the description of the video, “BANGKOK, Thailand – As illicit drugs go, Southeast Asia’s leafy plant “kratom” is hardly ideal for thrill seekers. Those who chew its sour tasting leaves catch a rush that nulls pain and jolts the senses like double shots of espresso. After about 20 minutes, the effects have faded.”

### **Teodorus Simbang**

The exporters.sg page for Nature Borneo lists Teodorus Simbang as the contact person. Nature Borneo is listed as in the Dietary Supplements and Nutrition, Health Food, and Medical Supplies trade networks. Teodorus Simbang’s LinkedIn page shows him in the “Alternative Medicine” industry. The Nature Borneo website, [www.natureborneo.com](http://www.natureborneo.com) shows kratom for sale, but does not have any specific claims regarding ingestion or regarding disease treatment. Because of this entry’s shipment, Teodorus Simbang has been shown to be associated with Cv Fabulift Borneo Mitra, which markets kratom for ingestion, as above.

### **Holly Chavez**

Holly Chavez is listed as the importer of record for this entry. Included with the entry is a product label for a company named “Kratom Crazy.” It is stated by the firm on [kratomcrazy.com](http://kratomcrazy.com) that, “[o]ur products are sold as a botanical for research and education purposes only. Our content is educational in nature and is not intended to promote the consumption of kratom. No medical claims are made or validated.” Despite this statement by the firm, several other parts of the website appear to promote kratom both for consumption and medical purposes.

On Kratom Crazy the following statement is found under the “Red Vein Indonesian” product category under the subheading, “How Popular is This Strain?”, “The main reported benefits associated with **taking** Indonesian Kratom are improved mood and pain reduction. The red vein strain is also noted for offering some stimulating effects and helping people feel less anxious.” (emphasis mine.) Under the “Which Alkaloids are involved?” Subheading the following statement is made, “All red vein strains have a higher than average percentage of 7-Hydroxymitragynine...and red Vein Indo is no exception. This particular alkaloid has been linked to stress relief and it is a natural analgesic, which means that it is likely to provide pain relief. An increased amount of Hydroxymitragynine is also credited by many **consumers** with boosting Red Vein Indo’s analgesic properties” and later on, “[t]herefore, **consumers** who are concerned about getting a product that was derived exclusively from the leaves and veins

should look for items that are marked as premium.” (emphasis mine.)

Additionally, the Kratom Crazy website contains an image with a link to an article entitled, “The Correct Dosage of Kratom” which shows what appears to be kratom capsules.

### **Unapproved New Drug**

In addition to the evidence of ingestion above which is sufficient to add the firms to Import Alert #54-15, several claims are found on the Kratom Crazy website. Examples of claims include:

- “The main reported benefits associated with taking Indonesian Kratom are improved mood and pain reduction. The red vein strain is also noted for offering some stimulating effects and helping people feel less anxious.”
- “This particular alkaloid (7-hydroxymitragine) has been linked to stress relief and it is a natural analgesic, which means that it is likely to provide pain relief. An increased amount of Hydroxymitragine is also credited by many consumers with boosting Red Vein Indo’s analgesic properties.”

This product is not generally recognized as safe and effective for the above referenced uses and therefore, the product is a “new drug” under section 201(p) of the Act [21 U.S.C. § 321(p)]. New drugs may not be legally marketed in the U.S. without prior approval from the FDA as described in section 505(a) of the Act [21 U.S.C. § 355(a)]. Therefore, the article is subject to refusal of admission pursuant to Section 801(a)(3) in that it appears to be a new drug within the meaning of Section 201(p) without an effective new drug application (NDA) [Unapproved New Drug, section 505(a)].

The article is also subject to refusal of admission pursuant to Section 801(a)(3) in that it appears to be a drug within the meaning of Section 201(g)(1)(B) and it lacks adequate directions for use. [Misbranded, Section 502(f)(1)].

Based on the foregoing, CFSAN supports the addition of the product and firms to Import Alert #66-41, “Detention Without Physical Examination of Unapproved New Drugs Promoted In The U.S.”

If you have any questions or need to discuss this case you may contact me at (240) 402-2062 or by e-mail at [Shawn.Goldman@fda.hhs.gov](mailto:Shawn.Goldman@fda.hhs.gov).

**Memorandum**

Date: September 25, 2015

From: Compliance Officer  
Labeling and Dietary Supplement Compliance Branch (HFS-608)  
Division of Enforcement  
CFSAN, Office of Compliance

Subject: Center Decision Memorandum - Detention Recommendation

To: Randy Boling, Compliance Officer  
New Orleans District, Memphis Resident Post (HFR-SE3550)

CFSAN **concurs** with the detention recommendation and **supports** the addition of the product and firms to Import Alert #54-15, "Detention without physical examination of dietary supplements and bulk ingredients that are or contain *Mitragyna Speciosa* or kratom" and Import Alert #66-41, "Detention Without Physical Examination of Unapproved New Drugs Promoted In The U.S."

CMS#: 477563  
Firm: Keith Poulos  
30 Cape Point Ct.  
Lynchburg, VA 24502  
FEI # 3011638460

Product: MITRAGYNA SPECIOSA LEAF

CFSAN has reviewed the evidence provided for the above referenced detention recommendation. Based on this review, CFSAN concurs with the detention recommendation and supports the addition of the product and firms to Import Alert #54-15 "Detention without physical examination of dietary supplements and bulk ingredients that are or contain *Mitragyna Speciosa* or kratom."

The entry documents specify that this entry is "*Mitragyna Speciosa* (Kratom it is not intended for human consumption it is raw material for soap making." However, CFSAN has found sufficient evidence to show each firm's knowledge of the intended use of kratom as a dietary supplement.

CFSAN was able to link the website ([www.blueridgeherbalsupply.com](http://www.blueridgeherbalsupply.com)) as well as a post on [www.reddit.com](http://www.reddit.com) to Keith Poulos through internet research.

The website [www.blueridgeherbalsupply.com](http://www.blueridgeherbalsupply.com) contains the statement: "Nothing on this page is sold as or is a dietary supplement, nor has any specific cure for any ailment. It is not for consumption." However, other statements on the website conflict with this disclaimer with regard to the knowledge and intent of the vendor to market its product for ingestion.

For example, [the](#) website has a FAQ page that states the effects of the body if consumed. The website phrases the question on the FAQ page as “What are the effects in the body of these different strains, if abused(consumed)?” The website lists effects such as pain relieving, gives the body energy, focus, and feelings of well-being. Additionally, a post on [www.reddit.com](http://www.reddit.com) by a user named bluerdigekratom, who appears to represent the company, states “I make 10x through a water process and sell it cheap, it's just more effective than ground up leaf. For those that need 30 grams at a time, this saves a lot of time and puking, as well as this process gets rid of the bad taste and looks more like coffee grounds.” The fact that the company mentions the taste implies that the product is for ingestion.

Therefore, the article is subject to refusal of admission pursuant to section 801(a)(3) in that it appears to be a dietary supplement or contain a dietary ingredient that is a new dietary ingredient for which there is inadequate information to provide reasonable assurance that such ingredient does not present a significant or unreasonable risk of illness or injury. [Adulteration, Section 402(f)(1)(B)].

### **Unapproved New Drug**

In addition to the evidence of ingestion above which is sufficient to place Keith Poulos on Import Alert #54-15, several claims have been found that are attributable to the firm. Examples of claims include:

- “[B]lock pain signals, and they are the same receptors that opiates stimulate as well”
- “[S]ubstitute for opiates”
- “[P]ain relieving effects.”

This product is not generally recognized as safe and effective for the above referenced uses and therefore, the product is a “new drug” under section 201(p) of the Act [21 U.S.C. § 321(p)]. New drugs may not be legally marketed in the U.S. without prior approval from the FDA as described in section 505(a) of the Act [21 U.S.C. § 355(a)]. Therefore, the article is subject to refusal of admission pursuant to Section 801(a)(3) in that it appears to be a new drug within the meaning of Section 201(p) without an effective new drug application (NDA) [Unapproved New Drug, section 505(a)].

Based on the foregoing, CFSAN supports the addition of the product and firm Keith Poulos to Import Alert #66-41, “Detention Without Physical Examination of Unapproved New Drugs Promoted In The U.S.”

---

CIN-DO,

Please find attached the releasable documentation used by FDA to subject *Mitragyna Speciosa* imported by Clayton Tannery/Moon Botanicals/Moon Kratom, Austin, TX to detention without physical examination. This information was current as of August 10, 2015; however, it should not be construed as a comprehensive list: the expectation is that all human consumption indications from the firm's website, social media sites, and other marketing materials will be removed.

As we discussed, this should allow your client the opportunity to address these issues in their attempt to overcome the appearance of a violation for the products they are importing. Below is a brief description of the relevance of this documentation.

The consignee in OASIS and on the airway bill in the entry documents (AEK-1072912-4.pdf) is listed as Clayton Tannery, located at 1902 Gentilly Cir, Austin, TX. The TSCA Certification in the entry documents lists the company name as "Moon Kratom" at the same address. The IRS document in the entry docs lists "Moon Botanicals LLC" as the name of the company at 1902 Gentilly Cir, and its owner as Clayton Tannery. On the entry documents for this entry the following statement is written, "[t]he contents of this package contains plant leaf material, known as a botanical specimen, To which will be further researched and studied to determine future use...[t]he contents of this package is not for human consumption. The contents of this package will be used for researched and development may possibly be used to make incense and soap." Furthermore, the following statement is found on the invoice for the shipment, "[n]ot for animal or human consumption. Soap scrubs, hair dye and other health and beauty aids." (see exhibit #1)

These statements of intended use are contravened by other statements attributable to the parties of the entry, as further outlined below:

The importer of record, as well as ultimate consignee, for this product is Clayton Tannery. On the Toxic Substances Control Act (TSCA) Certification, as well as several other places in the entry documents, Mr. Tannery claims he is the owner of Moon Kratom. Also included in the entry documents is an IRS EIN assignment form which identifies Mr. Tannery as the sole member of Moon Botanicals LLC. (see exhibit #1)

Moon Kratom's Facebook page categorizes the company under "Vitamins/Supplements". It also states that its products are sold in capsule form. This page provides a link to the firm's website, [www.moonkratom.com](http://www.moonkratom.com). (see exhibit #5)

Internet research for Moon Kratom reveals the website moonkratom.com. On the website under the kratom tab the following statements are found, “[t]he leaves of the Kratom tree have been used by the native people from the regions for their medicinal properties. The leaves are said to be psychoactive, The leaves are chewed by the Indigenous peoples. The leaves are reported to uplift mood and to address various health problems.” And “Kratom behaves as a mu-opioid receptor agonist. Kratom has been reported by the native people to be useful in the management of many chronic conditions. There are several studies under way to help better understand the usefulness. Kratom has a long history of use in this region for its reported stimulant and narcotic effects. Kratom seems to be popular in Thailand & Malaysia, where it is often chewed to help aid with physical labor. The working class seems to use Kratom for much the same reasons Americans use coffee. It is popular for those engaging in hard physical labor. , Kratom use is widespread, since Kratom trees grow in these regions.” (see exhibit #2).

Please continue to correspond through FDA’s Cincinnati District regarding this issue.

## Memorandum for the Record

Date: March 29, 2017

From: John Verbeten, Director  
Division of Import Operations

Subject: Import Alert #66-41, *Detention Without Physical Examination of Unapproved New Drugs Promoted In the U.S.*; Mood and Mind's Product Listing

I am documenting my supervisory review of, and agreement with, the decision in FDA's Division of Import Operations in ORA (DIO) to communicate information about Mood and Mind, Mr. Sturgis, and the firm's kratom products in IA 66-41 without using notice and comment rulemaking. DIO routinely issues import alerts, and updates information in import alerts, to share information with FDA employees located in FDA district offices who review import entries. Import alerts are not binding documents that require the automatic detention of the subject products, but rather are used to communicate information to agency staff as they consider whether to detain a shipment. Thus, import alerts are not substantive rules that require notice and comment rulemaking under the Administrative Procedures Act (APA) (see 5 U.S.C. § 553(b)(3)(A)).

IA 66-41 lists products from firms, including Mood and Mind, for which FDA has sufficient evidence to demonstrate the appearance of a violation under Section 505(a) and/or Section 502(f)(1) of the FD&C Act. IA 66-41, like other import alerts, does not require the automatic detention of products from the firms listed on the IA. Additionally, IA 66-41 does not impose any new obligations or requirements beyond the existing statutory requirements on foreign producers or importers. Importers remain subject to the exact same statutory obligation – that they refrain from importing into the United States drugs that violate the FD&C Act. Specifically, IA 66-41 provides that it: "does not create or confer any rights for or on any person, and does not operate to bind FDA or the public....Districts may detain without physical examination shipments of the unapproved and/or misbranded drugs listed in the attachments to this Import Alert." The use of the word "may" in IA 66-41 clearly demonstrates that the document is not intended to be a binding directive. Accordingly, IA 66-41 is not a binding, substantive rule that must be published through notice and comment rulemaking under the APA.

This memorandum is in response to the request from FDA's Center for Food, Safety, and Applied Nutrition to review the labeling for "mitragyna speciosa" (aka kratom, hereinafter "kratom") offered for importation under the entry numbers listed above.

The review was consulted to CDER's Office of Compliance, Office of Unapproved Drugs and Labeling Compliance, Health Fraud and Consumer Outreach Branch for a consultation. The Health Fraud Branch reviewed the product labeling for kratom, the website <http://www.moonkratom.com/>, and social media website <https://www.facebook.com/MoonKratom>. Based on this review, it was determined that kratom is an unapproved new drug in violation of section 505(a) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) [21 U.S.C. §355(a)]. Please see the detail review in CMS Case # 478123.

For the reasons cited above, kratom is subject to refusal of admission under section 801(a)(3) of the Act (21 U.S.C. §381(a)(3)), and CDER IECB supports its detention. CDER IECB also recommends adding "Mitragnyna Speciosa" (aka kratom) and its manufacturers listed above and importer, Clayton Tannery, be added to Import Alert 66-41("Detention Without Physical Examination of Unapproved New Drugs Promoted in the U.S").

\*\*\* When unaccompanied by labeling which makes drug claims, but other evidence attributable to the manufacturer, owner, or consignee exists which establishes the product's intended use as a a drug, charge:

"The article is subject to refusal of admission pursuant to Section 801(a)(3) in that it appears to be a drug within the meaning of Section 201(g) and it lacks adequate directions for use. [Misbranded, Section 502(f)(1)]". \*\*\*

OASIS Charge Code - DIRSEXMPPT

Recommending Office: FLA Imports Branch

Reason: The entry line(s) of product which are the subject of this CMS case were recently detained by the recommending District for the problem stated above.

Refer to the lead CMS case 457734 which contains all the original investigatory evidence, FLA-DO Compliance Team referral information along with the additional evidence collected by the Center for this DWPE recommendation.

Based on the evidence forwarded by FLA-DO Compliance Team, and the further confirmatory investigation conducted by CFSAN which was gathered through the internet; CFSAN concurs with the detention recommendation and supports the addition of the above referenced firm and individual and product to Import Alert #66-41.

The above referenced product is labeled as a "[n]atural Scrub powder" and further that is "[n]ot for human consumption." Despite the claims made by the importer that the product is intended as a "[natural Scrub powder" and "[n]ot for human consumption," CFSAN has found sufficient evidence to classify the entry as a drug within the meaning of the Federal Food, Drug, and Cosmetic Act (the Act).

The Act defines a "drug" to include, among other things, "articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease," 21 U.S.C. § 321(g)(1)(B), and "articles (other than food) intended to affect the structure or any function of the body." 21

U.S.C. § 321(g)(1)(C).....

[additional sensitive investigational information by CFSAN is attached in the CMS case]

.....In determining whether an article is a drug because of its intended use, the key element is the intent of the vendor. The intended use of an article may be shown by labeling claims, advertising, oral or written statements, or by the circumstances surrounding the distribution of the article. 21 C.F.R. § 201.128. In addition, intended use "may be shown by the circumstances that the article is, with the knowledge of [the vendor or its representatives], offered and used for a purpose for which it is neither labeled nor advertised." 21 C.F.R. § 201.128.

For the reasons set forth above, the article is subject to refusal of admission pursuant to

801(a)(3) of the Act. The article is a drug within the meaning of 21 U.S.C. § 321(g)(1)(B)

and/or 21 U.S.C. § 321(g)(1)(C), and it appears to be a new drug within the mean of section

201(p) without an effective new drug application (NDA)[Unapproved New Drug, section 505(a)].

Therefore, CFSAN concurs with FLA-DO's detention recommendation with regard to this entry as well as the addition of the product and firm and individual to Import Alert #66-41, "Detention without Physical Examination of Unapproved New Drugs Promoted in the U.S."

If you have any questions or need to discuss this case you may contact me at (240) 402-1922 or by e-mail at [aaron.dotson@fda.hhs.gov](mailto:aaron.dotson@fda.hhs.gov).

Instructions: Detain without physical exam this manufacturer/shipper/product combination.

FOI: No purging is required of this document.

CIN-DO,

Please find attached the releasable documentation used by FDA to subject *Mitragyna Speciosa* imported by Clayton Tannery/Moon Botanicals/Moon Kratom, Austin, TX to detention without physical examination. This information was current as of August 10, 2015; however, it should not be construed as a comprehensive list: the expectation is that all human consumption indications from the firm's website, social media sites, and other marketing materials will be removed.

As we discussed, this should allow your client the opportunity to address these issues in their attempt to overcome the appearance of a violation for the products they are importing. Below is a brief description of the relevance of this documentation.

The consignee in OASIS and on the airway bill in the entry documents (AEK-1072912-4.pdf) is listed as Clayton Tannery, located at 1902 Gentilly Cir, Austin, TX. The TSCA Certification in the entry documents lists the company name as "Moon Kratom" at the same address. The IRS document in the entry docs lists "Moon Botanicals LLC" as the name of the company at 1902 Gentilly Cir, and its owner as Clayton Tannery. On the entry documents for this entry the following statement is written, "[t]he contents of this package contains plant leaf material, known as a botanical specimen, To which will be further researched and studied to determine future use...[t]he contents of this package is not for human consumption. The contents of this package will be used for researched and development may possibly be used to make incense and soap." Furthermore, the following statement is found on the invoice for the shipment, "[n]ot for animal or human consumption. Soap scrubs, hair dye and other health and beauty aids." (see exhibit #1)

These statements of intended use are contravened by other statements attributable to the parties of the entry, as further outlined below:

The importer of record, as well as ultimate consignee, for this product is Clayton Tannery. On the Toxic Substances Control Act (TSCA) Certification, as well as several other places in the entry documents, Mr. Tannery claims he is the owner of Moon Kratom. Also included in the entry documents is an IRS EIN assignment form which identifies Mr. Tannery as the sole member of Moon Botanicals LLC. (see exhibit #1)

Moon Kratom's Facebook page categorizes the company under "Vitamins/Supplements". It also states that its products are sold in capsule form. This page provides a link to the firm's website, [www.moonkratom.com](http://www.moonkratom.com). (see exhibit #5)

Internet research for Moon Kratom reveals the website moonkratom.com. On the website under the kratom tab the following statements are found, “[t]he leaves of the Kratom tree have been used by the native people from the regions for their medicinal properties. The leaves are said to be psychoactive, The leaves are chewed by the Indigenous peoples. The leaves are reported to uplift mood and to address various health problems.” And “Kratom behaves as a mu-opioid receptor agonist. Kratom has been reported by the native people to be useful in the management of many chronic conditions. There are several studies under way to help better understand the usefulness. Kratom has a long history of use in this region for its reported stimulant and narcotic effects. Kratom seems to be popular in Thailand & Malaysia, where it is often chewed to help aid with physical labor. The working class seems to use Kratom for much the same reasons Americans use coffee. It is popular for those engaging in hard physical labor. , Kratom use is widespread, since Kratom trees grow in these regions.” (see exhibit #2).

Please continue to correspond through FDA’s Cincinnati District regarding this issue.

## WELCOME TO KRATOM CRAZY

Welcome to **Kratom Crazy**. We offer premium **kratom** at competitive prices. Our **kratom** powder is extremely high-quality and is backed by a full 30-day satisfaction guarantee. We are confident that you will find the alkaloid percentage of our **kratom** strains to be some of the highest in the market today.

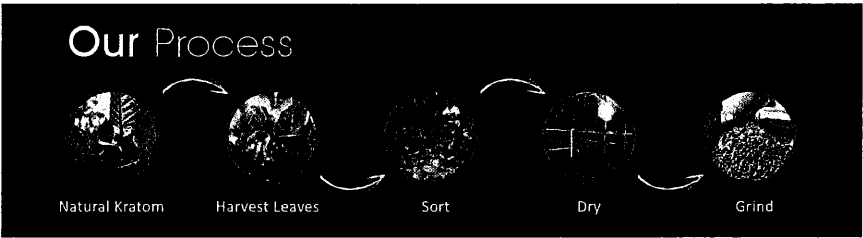

Our **kratom** quality is superb due to our vast connections with veteran farmers. The foundation of this company was built on delivering premium quality **kratom** to our customers at great prices. Many vendors sell **kratom** for quick profits and do not always ensure that the source of their product is of high quality. Also, some suppliers do not test their products before bringing to market and since quality can vary from batch to batch, some products can be of inconsistent quality. We do not follow these same methods and make sure the product is tested for quality before selling it to our customers.

## KRATOM FARMING METHODS

How we select and harvest our **kratom** is key. Our products are searched out naturally, not grown on farms contrary to popular belief. **Kratom** is a tough crop to grow in a controlled setting. The plants need plenty of sunlight in the right proportions, along with ample shade and a proper nutrient/water supply. For these reasons, top quality **kratom** needs to be sourced in the right areas.

Our farmers go direct to the natural environments where **kratom** flourishes. Only the mature plants are selected, and the young are left to grow into something more. We have direct contact (http://kratomcrazy.com/contact/) with our farmers and routinely exchange information. They send out pictures of the harvesting, drying and grinding processes to validate that the product is of the highest quality.

These farmers are in this business for the long haul. **Kratom** harvesting is a craft that demands experienced farmers. Since the strains are grown in the wild, an experienced farmer needs to identify strains and prospect new sustainable areas to harvest. An experienced farmer will also only go after the mature crops and harvest them at the right time of year.

## FARMING SUSTAINABILITY

**Kratom** sustainability is a huge problem. Farmers out to make a quick buck are not good for the sustainability of **kratom**. Harvesting too many plants in a given location can quickly choke the **kratom** supply in that area. Many people are unaware of this serious problem unethical farmers are causing. Conscious consumers should be aware.

Our farmers use a method of sustainability in their harvesting. When they go into the forest to harvest, they avoid harvesting an entire area. Many of the young immature plants are left to grow. These farmers do this for their own good. They want to be able to harvest these plants in future years. They travel by boats to harvest

different areas. The method they use is the best for the sustainability of quality, alkaloid-rich **kratom**.

## DRYING

Aside from harvesting mature leaves, proper **kratom** drying is the single second most important factor for a quality **kratom** product. To ensure that the delicate alkaloids are preserved, a careful process needs to be executed during the drying phase. Our **kratom** farmers know how important the drying process is and use the best practices during this process.

First of all, the drying needs to be done indoors. The drying process should not be executed in direct sunlight, but rather in a dark and cool climate controlled environment. Drying is done on special racks that allow air to travel above and below the leaves. It takes several days of drying before the leaves are ready for grinding.

## KRATOM ALKALOIDS

The various strains of Mitragyna are of extreme interest to the research community. There are many alkaloids within the plant that may have future medical purposes. Some of the most prominent alkaloids of interest include:

- Mitragynine
- Mitraphylline
- 7-hydroxymitragynine
- Mitragynine Pseudoindoxyl

By harvesting mature plants during the right time of year and drying in the best recommended practices, we can offer an optimal product. Our product has not been stomped on by middlemen trading companies and we deal direct with experienced farmers. This leads to alkaloid-rich **kratom** that our customers love. We are confident that you will be impressed with the alkaloid profile across all of our strains. Each strain offers a differing percentage of exciting alkaloids for your research purposes.

## CHOOSE US FOR OUR QUALITY

We want you to trust us. Even though we are rather new in the **kratom** market, our company understands the importance of offering a quality product. Our supply chain is sustainable and you can trust us to be your long term supplier of **kratom**. We will never sacrifice quality for profits and understand the frustrations of getting an inferior product. If at any time, you feel the product is not up to your standards, we will send you return postage and refund the whole cost of your order.

**Are extracts a No No?** question (self.kratom)  
submitted 3 months ago by [BestKratomBuy](#)

Hey guys,  
I was wondering what the general consensus was on vendors who sell extracts/concentrates. Is this something the community thinks should be forbidden? Please voice your opinion!

[FDA bans sale of Kratom](#)

all 28 comments

SORTED BY: **BEST**

[\[-\] cement\\_shoes](#) 5 points 3 months ago

I really don't prefer to patronize vendors with huge amounts of extracts. Extracts kind of bastardize the Kratom experience.

[permalink](#)

[\[-\] ConstantEnergy](#) 7 points 3 months ago

How to put this delicately...

It's a HELL NO!

Extracts fuck up your tolerance and gives Kratom a bad imago, which is often abused by media.

[permalink](#)

[\[-\] KratomHELPEdme](#) 1 point 3 months ago

Yuppers I would rather switch strains then go to an Extract for a better night feeling the next day or 3 after doing extracts You can't get that good warm feeling again for days.

[permalink](#) [parent](#)

[\[-\] Polar-94](#) 7 points 3 months ago

Yes. It's takes the wonderful plant that is kratom and gives it a more "drug-like" image. They also can be more addictive / potentially dangerous.

[permalink](#)

[\[-\] \[deleted\]](#) 8 points 3 months ago

Kratom is a drug. Lie to yourself all you want, but it is what it is

[permalink](#) [parent](#)

[\[-\] Polar-94](#) 1 point 3 months ago

Of course it is, but then so is coffee. I was referring to the public perception of kratom becoming more "druggy" if people start using extracts instead of the raw plant.

[permalink](#) [parent](#)

[\[+\] \[deleted\]](#) 3 months ago (6 children)

[\[-\] douglasg14b](#) 3 points 3 months ago

When properly prepared and dosed I don't see how it "can be more addictive". If you are administering similar doses via similar pathways then the addictiveness should not change?

I see the benefit of extraction being reduced gastrointestinal distress, and not having to deal with the taste. Using an extract or using the powder, you are still using it for the same end are you not?

[permalink](#) [parent](#)

[\[-\] \[deleted\]](#) 2 points 3 months ago

Lot of kratom users don't understand what an extraction is. It's no more addictive than plain leaf.

[permalink](#) [parent](#)

[\[-\] douglasg14b](#) 3 points 3 months ago

Exactly, ignorance of what it is does not mean you can blab about how bad it is.

[permalink](#) [parent](#)

[\[-\] rocker199021](#) 1 point 3 months ago

I think a few negatives are preparation of extracts. A lot come from China not exactly the highest quality. Another is we know the traditional use of kratom leaf is safe extracts could possibly be hazardous.

[permalink](#) [parent](#)

[\[-\] pleaschooseusername](#) -1 points 3 months ago

yeah... you do know that the people in thai chew fresh leafs, right? you do know that the non-enhanced) kratom we take is abut oh... 100 times stronger compared to chewing fr

i mean, you do know this right? news flash smart guys: the people in thai think we are insane what with the huge amounts of kratom we take.

[permalink](#) [parent](#)

[–] [rocker199021](#) 2 points 3 months ago

I think you may be incorrect . Ours is probably less potent than theirs but by weight theirs ways more but they go by # of leaves. This is not counting dried leaf more than likely loses potency during the process. Also I know a guy who is from Malaysia and he says their they make tea

[permalink](#) [parent](#)

[–] [bigtime1985](#) 2 points 3 months ago

although reddit will doom and gloom extracts, they are fun when used responsibly. Dont take more than 2x a week, this is also considereing ou take time off of kratom completely a few days here and there.....

[permalink](#)

[–] [neptunesice](#) 1 point 3 months ago

Yeah, I enjoy crushed Maeng Da leaves more than extracts. Extracts are hard to dose and I accidentally overdosed on a 60x Maeng Da extract and I had a lot of anxiety. Stick to the leaves man. Extracts are either too weak or too strong. Its hard to find that sweet spot.

[permalink](#)

[–] [PoppySeedsKratom](#) 1 point 3 months ago

That is why I like the buy-kratom.us/ extract The hard core users say it is weak but as a newbie just trying it is great easy to gauge . I use it 1 time a week for a better night feeling. Doesn't seem to fuck up your tolerance . And can say it is Very Cheap compared to other vendors.

[permalink](#) [parent](#)

[–] [BlueRidgeKratom](#) 1 point 3 months ago

I make 10x through a water process and sell it cheap, it's just more effective than ground up leaf. For those that need 30 grams at a time, this saves a lot of time and puking, as well as this process gets rid of the bad taste and looks more like coffee grounds. Never ever had an issue from anyone yet. Active compounds being called drugs is the source of confusion and inability to coherently discuss anything that actually helps. Using toxic solvents to sell extracts seems to be taboo, and I agree with that. Fun to experiment though, who knows what uses will be found!

[permalink](#)

[–] [MarcusWilliams269](#) 1 point 3 months ago

The only viable argument against extracts is that it CAN give Kratom a bad image. Not saying it actually does, it's just whether the media decides to twist it that way. As a matter of fact, they twist it whichever way they'd like to either way.

The bottom line is, all you're doing by extracting alkaloids from Kratom leaves is getting exactly what you want out of the plant, without all the unnecessary leave particles. It's like drinking a slim fast for meal replacement, easily abused when you don't realize that concentrated, little bit replaces something that's normally much bigger. Optimally, you would take a little bit of extract half the time, let's say half a gram compared to the 3 grams of Kratom you'd have to take, and regular Kratom leaf the other half of the time. I preach rotation on Reddit all the time, and the extracts are a great way to practice that and keep your body guessing.

In my personal opinion, the potential negatives of extracts lie only with the person using them, whether they have the will power to use the product correctly. Reputable dealers like theKratomKing and OnlineKratom wouldn't be selling it if it were a no no.

[permalink](#)

[–] [crow38](#) 1 point 3 months ago

extracts are fine, people who says other wise are full of themselves. extracts arent dangerous if used the most common ways. you arent going to be able to die from it

[permalink](#)

[–] [stayxvicious](#) 1 point 3 months ago

How long does it take for your tolerance to get back to baseline after burning an extract, typically? I usually burn twice a day, once in the morning and once at night. 4 grams in the morning, and about 5-6 at night, yet my tolerance seems to have remained at a steady baseline level after my first half-dozen or so burns, and I can still get pretty euphoric sometimes. If I did an extract (like the Gold Standard Extract at HS or even the enhanced Red Thai), would I presumably be back to that baseline state and be able to continue my routine if I skipped a day or two after burning an extract? This is my biggest concern - is it really worth the extra money and potentially higher tolerance?

[permalink](#)

[–] [\[deleted\]](#) 1 point 3 months ago

When used responsibly, you get the same effects from a much lower dose that is easier to consume. I see no problem with that.

Buying from vendors, on the other hand, seems to be a massive ripoff. I'll be turning my bulk leaf into resin for person I be lost, but so will a huge amount of nausea.

< > discussions in /r/kratom

[FDA bans sale of Kratom](#)

...rience of burning kratom is not the most pleasant. Not that its aroma is terrible, but

it just requires a good amount to get desired effect. I do think that there is a future for extracts.

[permalink](#) [parent](#)

[\[-\] touch\\_my\\_boob](#) 0 points 3 months ago

I'm concerned about liver troubles with Kratom. My enzymes were elevated. One doctor (my PCP) told me I need to have a bunch of tests including an MRI, a different doctor (a surgeon who fixed my hernia last year) told me his own enzymes always run similarly high and he would not worry about it.

I was wondering if extracts might help as they remove a lot of the plant matter.

Strangely enough, when my PCP told me my enzymes were high, knowing I don't drink much at all, said the next culprit were herbal supplements. At the time I had been taking 5-8gm kratom only occasionally but I had also been taking phenibut 3x / week for about a year.

[permalink](#)

[\[-\] gatorpaw](#) 0 points 3 months ago

Wow such strong opinions about the extracts, huh, but I can appreciate this. I don't agree with it but certainly understand everyone has an opinion....As with everything there are good and bad sides to this. Yes people have the potential to abuse extracts at a higher level but how are they different then the continued growth and development of Marijuana and the wonderful things accomplished with extracts here. The kratom plant is in the beginning stages of understanding. Look at the turmoil pot went through and how far it has come today with decriminalization and legality in some areas. I believe for kratom to continue down this round of acceptance we must first accept all the things about it. We're not going to stop the people that want to abuse it or the ones that want to turn profit without regard for how they effect the community of kratom user. So, do I agree that extracts are evil and have no place? Absolutely not! Do they have potential to disrupt our cause? Yes they do! But they also have the potential to do good things. We will just have to wait and see. I would suggest to use caution and exercise good judgement when involving yourself with them and the vendors that sell them. But everyone has an opinion... lol

[Home](#)   [Kratom and Extracts FAQ:](#)

## Kratom and Extracts FAQ:

Kratom is a native plant to southeastern asia, and thousands of kilograms are imported daily into the United States alone. There are many uses for Kratom, and its main useful property is hydrophobia: it is not water soluble because the main alkaloids do not dissolve in water(they will dissolve a little if the water is at a perfect PH of 7, but that is hard to maintain once the kratom is added). This property allows Kratom to be an extremely effective product for facial scrubs, soaps, and even beginning chemists to practice alkaloid extraction. There are many kratom soap suppliers and makers, and its very easy to make at home. It is completely non-toxic(the FDA may try to say otherwise, but hundreds of years of use show otherwise). Other uses for Kratom have been found, and a lot of its popularity has been evolved by the effective properties its alkaloids have that block opiate related sickness and PAWS(Post acute withdrawal syndrome). Some sell kratom directly as a substitute for opiates or ioids, and in fact Kratom has opioid alkaloids within it. It is illegal to sell this product for consumption, or to be sold as a cure for any ailment, thanks to the FDA. I get a lot of questions about dosage, how to consume it, and how to use it to get off of dangerous prescription opiates. However, I clearly state that I am not a scientist, pharmacist, and it is not only not my job but not in my interest whatsoever to help give you advice on how to break the law. Do what you will with what you have, but please refrain from asking me how to abuse my product. I get flooded with these questions, and it is illegal for me to suggest that kratom is a cure for anything. However, here are some frequently asked questions that I have done a good deal of research on, and as a basic organic chemist, I feel fine posting some generally asked questions. I am not suggesting that you consume kratom or that it will help you with whatever issues you may have, but here you go:

Q: What is in Kratom that seems to block pain signals in the brain, and why can it help with opiate sickness?

A: There are debatably around 60 different alkaloids within a kratom leaf. Mitragynine and 7-hydroxymitragynine are the two alkaloids that bind to opioid receptors. Agonizing these receptors will absolutely block pain signals, and they are the same receptors that opiates stimulate as well, making it a successful substitute for opiates.

Q: What are all the different strains?

A: There are 3 types of kratom trees. The different strains(Red, white, green), are crossbred with different trees that contain similar alkaloids, creating a strain called Maeng Da(has 12 horns, much like a holly leaf has 5 horns), and other horned strains(3 horns). Maeng Da is genetically higher in alkaloid content than a normal kratom Tree. The different colors are due to seasons of growth: there are not red vein trees, and green vein trees, there are just kratom trees with leaves picked in different seasons. White vein kratom can also undergo a type of slower drying process, making it into something sold as yellow vein. There are lots of different types of colors that are being sold, but the 3 basic types are just leaves picked from the same tree in different seasons. If abused, they ALL have pain relieving and opiate sickness stopping effects.

Q: What are the effects in the body of these different strains, if abused(consumed)?

A: They all have pain relieving effects. In small amounts of 1-2 grams, kratom can give the body energy, focus, and feelings of well being. In larger doses of 4-10 grams, any strain can be sedating; however, each color leaf has profoundly different effects. Red vein is the most sedating color, having the best pain relieving effects, and is very restful. White Vein is the opposite end of the spectrum, and is very euphoric and gives the body energy, even in larger doses. Green vein is in the middle of the spectrum, generally, and is probably the most sought after strain due to its balance of pain relief, mental energy, and physical sedation. Yellow vein is really a white vein, but as I stated above, the different drying process actually takes away a bit of the stimulating effects and will feel more euphoric and balanced. Maeng Da is a hybrid tree, genetically higher in alkaloid content, and there are also 3 colors available for this, just like a regular kratom tree. It just happens to feel more euphoric than sedating generally, and many consumers find it to be the most pleasant tree to purchase leaf from.

Q: What are Kratom extracts?

A: Kratom extracts come in many forms. You need to be extremely careful what state you get the extract in, and make sure it is completely dry. To extract alkaloids from a plant, strong solvents are required(Chloroform, ethanol, methanol, ether), and remnants of these strong alcohols are left over

100% for sure if the product you receive is still sticky or wet. It still needs further evaporation. The extracts I make are always a powder, because I want people who use my products for legitimate purposes to be able to make facial scrubs and soaps without rubbing dangerous solvents on their face. Anyone will hurt another person to make a quick buck, so make sure you know what you are getting. The extracts I make are clean, safe, and ready to turn into a successful end use product. I also oxidize my extracts, which turns an already existing alkaloid in kratom called pseudoindoxylmitragynine into 10% more presence. This alkaloid actually closely replicated a neurotransmitter, serotonin, actually more of a mix between serotonin and lysergic acid, or tryptophan. The reason I try to oxidize my extracts is because it more easily evaporates the unwanted plant material, giving you the hydrophobic alkaloids that are useful. My extracts take weeks of tedious work, and careful measuring to make, and I sell them far below the normal market value. It actually angers me when I have received samples of the extracts others make; they are ineffective, and dangerous because of lack of patience and greed.

I hope this helps those with questions, I hope I can help you get your orders out quickly, and please refrain from asking advice on how to abuse this product. I know for a fact there are dozens of websites dedicated to destroying the legality of the sale of this plant because they give this type of advice. I'd be happy to link to them if you ask me, but I will not provide information like this here; this is a distribution center, not an advice forum :)

Much love everyone, enjoy kratom, and be safe!

#### Order in Bulk

Excited to launch my new webstore!

### Order in Bulk

Posted on Jun 9th 2015

Share

Tweet

Prices for those interested in distributing or already distributing and need a solid supply line:

\*these prices do not necessarily include shipping\*

5kg: \$75

10-25kg: \$55/kg

26-50kg: \$45/kg

51-100+kg: \$42

I cannot sell bulk over 5kg out of my personal stock. The way this works is you must send the full amount, then I have it shipped either directly to you, or shipped to my shop first, then to you. I cannot afford to order 50kg for someone and then they back out of the deal, so that is why I do this. Also, if you have it shipped straight from my supplier, it will save you the shipping cost of having it shipped to two different locations. If you'd

rather have it shipped to me first, I can do that, but you must cover the extra shipping cost.

There is no limit on how much I can access, but for any size orders listed above, please contact me so I can describe the process and how to lessen the possibility of customs seizure.

Keith (434) 851-9095

BULK      KRATOM      LARGE ORDERS

## Excited to launch my new webstore!

I am proud to announce, with the help of good friends that I consider family, the launch of this new kratom shop! I started selling kratom hand to hand in the fall of 2014, and took my business online in February 2015, mostly using facebook. This has been an incredible adventure so far, filled with [...]

Keith Poulos

August 13 at 11:22pm · Lynchburg, VA ·

Please, kratom advocates, the FDA has made an alliance with Fed Ex to seize all kratom, and are making bizzare claims about it. Go to the FDA website and it will prompt you to leave a review. There is a section where you can state your opinion about the information they provide. Lets let them know that we know they are lying to keep they OxyContin on the streets, and they are no better than a drug cartel. Ive already done so. Lets let them know that we know they are lying!

smh...who are they aligned with?

August 13 at 10:43pm

Philip Fairbanks

the freshest (as in newest to the list) family on the forbes list, the "redneck heroin" billionaires...

August 13 at 10:49pm · Edited

Philip Fairbanks

And yuck, when did FDA approve oxy for kids?!

August 13 at 10:50pm · 1

Joy Vajarsky

Oh no.. Tell me when it's time to buy a shit ton of it.. This is outa hand..

August 13 at 10:52pm

Keith Poulos

Its been approved for kids nationwide for years, even mixed with amphetamines.

August 13 at 10:54pm

Joy Vajarsky

This makes me sick. I told my doctor about kratom and he said fantastic, because its natural.. Grr

August 13 at 10:56pm

Keith Poulos

I just talked to fed ex and got the FDA legal department phone number, and told them I will sue for business damages and the lies they have promoted about my products if they dont release it immediately. Apparently it was last investigated today at 4pm, but its 56kg and its been 6 weeks...makes no sense.

August 13 at 10:57pm · 1

Joy Vajarsky

Your in part of what they seized

August 13 at 10:58pm · 1

Billy Weaver

56 kilos? Omg wow ... And 6 weeks!?

August 13 at 10:58pm · 1

Chad Steven

I just had a FedEx delivered in 3 days flat last week..FedEx even contacted me before it hit America, for FDA clearance, asked a few questions, I answered, it went through in 2 hours..I think they researched my website, which was clean...the shipper put my website name next.to my actual name.. Shit if that helps things along, might just do it every time..since they do research importers, it just made it easy for them

August 13 at 11:06pm · Edited · 3

Keith Poulos

Chad, so you had a fed ex delivery go through last week?

August 13 at 11:10pm

Chad Steven

Yup

August 13 at 11:10pm

Keith Poulos

U mind if I ask was it over 25kg?

August 13 at 11:11pm

Keith Poulos

It might have something to do with weight

August 13 at 11:11pm

Chad Steven

It was 57 kg, from you know who

August 13 at 11:13pm · Edited

Joy Vajarsky

So get a website with soaps n other things..

August 13 at 11:11pm · 2

Chad Steven

6 weeks is a long time though, almost too long

August 13 at 11:12pm · Edited

Keith Poulos

Yeah my website clearly states that nothing on this page is useable in its current form, and must be made into an end user product. It prohibits any

form of ingestion, and I even added that if you consume it ill ban you from further sales.

August 13 at 4:14pm · 1

Keith Poulos In my FAQ I called consumption "abuse" even. 6 weeks is ridiculous.

August 13 at 11:14pm

Chad Steven Give them your website info..all they need is proof it's being sold right I think

August 13 at 11:14pm

Keith Poulos Yeah, I did. thats the problem. lol

August 13 at 11:15pm

Chad Steven Yikes...maybe they didn't like something, do you have descriptions? Do you ship with the same name as Facebook? Or under a company? I'm certain they research Facebook

August 13 at 11:17pm · Edited

Keith Poulos Same name, same company, same policies described. Ive been pretty thorough I thought. I have a license, passed a office examination today, and told them ill bring this to court if I have to. Easily won in my opinion

August 13 at 11:18pm

Keith Poulos ill happily sue for business damages both on the distribution end and the supply end.

August 13 at 11:21pm

Chad Steven Idk man, what is FedEx saying?

August 13 at 11:21pm

Keith Poulos They said that they are holding the box at the fed ex facility, but the FDA is putting a hold on it. I am one of at least 4 people ive talked to today in the same situation. So I have confirmed that they are working together on this, but they only ga... See More

August 13 at 11:25pm · 1

Keith Poulos Very concoluded. An investigation should be very simple.

August 13 at 11:25pm

Chad Steven Ughhh...Idk even know if I want to try FedEx now...

August 13 at 11:27pm

Chad Steven FDA works with DHL also, nothing new...but customs is controlled by the fda, what the fda says goes

August 13 at 11:29pm · Edited

Keith Poulos yeah, Im not going through them.. I think this calls for some caution. Same principle as gambling.

August 13 at 11:28pm

Keith Poulos EMS has been doing fine for me, idk

August 13 at 11:28pm

Keith Poulos well I gotta get some stuff done, getting my driverslicense in the AM

August 13 at 11:29pm

Sambas Mitragyna yup EMS much better than another even more expensive for shipping cost but more safety.

Got an LG tablet for sale, with incipio hard case designed for it: \$60 altogether, plus \$6 shipping unless you're in town. This is practically brand new, barely used it and got it a few months ago. Works great, fast no cosmetic damage, att service comes with it the first month. If you need a good tablet with free service for a month, this is your deal.

10x red vein and 10x Maeng da extract, final stages of drying, ready for sale  
tomorrow, only. 50 cents per gram! This is more oxidized than previous times,  
bringing out more euphoric alkaloids. Already tried it, get it while it lasts! I have  
yellow vein 10x as well!

#### Blue Ridge Herbat Supply

Saga, calea, Hawaiian baby rosewood seeds, linctures, 10x extract, and valerian root. Plus got Kratom, red and green maeng da, red Borneo, green Borneo and Malaysian, and yellow! Shipping in 24hrs, just give me the word! I take verimo and credit cards

Share

Christopher DeKleva To what's the deal with calea? Kratom gives me nightmares are they worse with that stuff? How does it smoke? Any waking effects? I already lucid dream most every night  
August 19 at 5:47pm

Keith Poulos

August 13 at 11:22pm · Lynchburg, VA ·

Please, kratom advocates, the FDA has made an alliance with Fed Ex to seize all kratom, and are making bizzare claims about it. Go to the FDA website and it will prompt you to leave a review. There is a section where you can state your opinion about the information they provide. Lets let them know that we know they are lying to keep they OxyContin on the streets, and they are no better than a drug cartel. Ive already done so. Lets let them know that we know they are lying!

Excellent products and service! I highly suggest anyone looking for good kratom

Waterstone Pizza

Best place to eat in town. Best menu, great service.

Georgia Freeman I love this as your profile picture. I look at it every time I miss you two, while I'm at work. . Like right now.

Got an LG tablet for sale, with incipio hard case designed for it: \$60 altogether, plus \$6 shipping unless you're in town. This is practically brand new, barely used it and got it a few months ago. Works great, fast no cosmetic damage, att service comes with it the first month. If you need a good tablet with free service for a month, this is your deal.

### Hawaiian Baby Rosewood Seeds(*Argyrea Nervosa*)

These seeds germinate quickly, and grow into beautiful vines, pleasant to view. As always, please do not attempt to consume this product.

10x red vein and 10x Maeng da extract, final stages of drying, ready for sale tomorrow, only. 50 cents per gram! This is more oxidized than previous times, bringing out more euphoric alkaloids. Already tried it, get it while it lasts! I have yellow vein 10x as well!
